| <b>Course Title</b>     | <b>: JAVA PROGRAMMING</b>                                                                                                                                                                                                                                                                                                                                                   |
| <b>Course Code</b>      | <b>: 314317</b>                                                                                                                                                                                                                                                                                                                                                             |

**I. RATIONALE**

Java is platform independent, open-source object-oriented programming language and used for web applications. Java has the broad industry support and is prerequisite with many allied technologies like Java Server Pages, Android Application Development. This course will enable students to develop applications using java.

**II. INDUSTRY / EMPLOYER EXPECTED OUTCOME**

Develop standalone and network-based applications using Java.

**III. COURSE LEVEL LEARNING OUTCOMES (COS)**

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Develop java program using classes and objects.
- CO2 - Develop java program for implementing code reusability concept.
- CO3 - Develop program to implement multithreading and exception handling.
- CO4 - Develop java program for implementing event handling using window-based application components.
- CO5 - Implements network programming in java.
- CO6 - Develop java program for managing database.

**IV. TEACHING-LEARNING & ASSESSMENT SCHEME**

**JAVA PROGRAMMING****Course Code : 314317****Total IKS Hrs for Sem. : 0 Hrs**

Abbreviations: CL- Classroom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, \*# On Line Examination , @\$ Internal Online Examination

Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.\* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. \* Self learning hours shall not be reflected in the Time Table.
7. \* Self learning includes micro project / assignment / other activities.

**V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT**

| Sr.No | Theory Learning Outcomes (TLO's) aligned to CO's.                                                                                                                                                                                                                                                                                                                                                                                                                      | Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Suggested Learning Pedagogies.                                                                               |

| 6     | <p>TLO 6.1 Choose relevant database connectivity methods.</p> <p>TLO 6.2 Describe two tier and three tier architecture of JDBC.</p> <p>TLO 6.3 Choose relevant type of JDBC driver for the specified environment.</p> <p>TLO 6.4 Elaborate steps with example to establish connectivity with the specified database.</p>                                                                                                                                                                                                  | <p><b>Unit - VI Interacting with Database</b></p> <p>6.1 Introduction to JDBC, ODBC</p> <p>6.2 JDBC architecture: Two tier and three tier models</p> <p>6.3 Types of JDBC drivers, Class Class, DriverManager class, Connection interface, Statement interface, PreparedStatement interface, ResultSet Interface</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Lecture Using Chalk-Board Presentations</p> <p>Flipped Classroom</p> <p>Hands-on</p> |

**VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES.**

**JAVA PROGRAMMING****Course Code : 314317**

| <b>Practical / Tutorial / Laboratory Learning Outcome (LLO)</b>           | <b>Sr No</b> | <b>Laboratory Experiment / Practical Titles / Tutorial Titles</b>                                                                                                                                                                    | <b>Number of hrs.</b> | <b>Relevant COs</b> |
|---------------------------------------------------------------------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|---------------------|
| LLO 1.1 Install any IDE software application.                             | 1            | * Setup Java Programming development environment using: <ul style="list-style-type: none"> <li>• Command prompt.(Classpath and path setup)</li> <li>• Any IDE (Eclipse, Netbeans, VScode, Jcreator etc.).</li> </ul>                 | 2                     | CO1                 |
| LLO 2.1 Implement programs to evaluate different types of Expressions.    | 2            | Write programs to evaluate different types of expressions.                                                                                                                                                                           | 2                     | CO1                 |
| LLO 3.1 Develop program to implement different control structures.        | 3            | Write programs to demonstrate use of: <ul style="list-style-type: none"> <li>• if statements (all forms of if statement)</li> <li>• Switch – Case statement</li> <li>• Different types of Loops(for,while and do..while).</li> </ul> | 2                     | CO1                 |
| LLO 4.1 Develop program to implement different control structures.        | 4            | *Write programs for implementation of different methods of: <ul style="list-style-type: none"> <li>• String class.</li> <li>• StringBuffer class.</li> </ul>                                                                         | 2                     | CO1                 |
| LLO 5.1 Implement array and vectors in Java.                              | 5            | * Write programs to demonstrate: <ul style="list-style-type: none"> <li>• Use of Array.</li> <li>• Use of Vectors .</li> </ul>                                                                                                       | 2                     | CO1                 |
| LLO 6.1 Convert primitive data types into object and vice-versa.          | 6            | Write programs using Wrapper Class : <ul style="list-style-type: none"> <li>• to convert primitive into object.</li> <li>• to convert object into primitive.</li> </ul>                                                              | 2                     | CO1                 |
| LLO 7.1 Initialize objects using constructors.                            | 7            | Develop a program for implementation of different types of constructors.                                                                                                                                                             | 2                     | CO1                 |
| LLO 8.1 Implement concepts of inheritance for code reusability.           | 8            | Develop program to implement: <ul style="list-style-type: none"> <li>• Single inheritance.</li> <li>• Multilevel inheritance.</li> </ul>                                                                                             | 2                     | CO2                 |
| LLO 9.1 Implement multiple inheritance.                                   | 9            | * Develop program for implementation of interface.                                                                                                                                                                                   | 2                     | CO2                 |
| LLO 10.1 Implement packages in Java.                                      | 10           | *Write programs to demonstrate use of : <ul style="list-style-type: none"> <li>• Built in packages</li> <li>• User defined packages.</li> </ul>                                                                                      | 2                     | CO2                 |
| LLO 11.1 Identify the different types of errors using exception handling. | 11           | Write programs for implementation of try, catch and finally block.                                                                                                                                                                   | 2                     | CO3                 |

| <b>Note : Out of above suggestive LLOs -</b> <ul style="list-style-type: none"> <li>• '*' Marked Practicals (LLOs) Are mandatory.</li> <li>• Minimum 80% of above list of lab experiment are to be performed.</li> <li>• Judicial mix of LLOs are to be performed to achieve desired outcomes.</li> </ul> |       |                                                            |                |              |

## VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

### Other

- Complete any course of Java Programming on Infosys Springboard/Spoken Tutorial/NPTEL
- Develop java code for given problem suggested by course teacher.

### Micro project

- Develop mini-ATM machine system. It should accept account\_no, account\_holder\_name, account\_balance and perform operations such as withdrawal, Deposit and balance check.
- Develop Quiz Management System. Quiz should accept student credentials and contain 10 MCQ type questions. Determine the final result. Save the result in table along with student credentials.
- Energy Billing System: Expected to develop bill amount module based on usage of energy consumption.
- Develop Employee Management System. Insert employee details such as employee\_name, emp\_id, emp\_salary etc.. into database and retrieve data from table.
- Any other micro project as suggested by course teacher.

### Assignment

- Solve assignment covering all COs given by course teacher.

**Note :**

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicial mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.
