

B.Tech Electronics & Communication Engineering

Sixth Semester (Session 2023-24)

Course Name: BEC3606: PLC and SCADA

BEC3606	Course Outcomes
CO 1	Categorized PLC configuration using IO Modules
CO 2	Evaluate the physical parameters using PLC
CO 3	Examine the operation of analog and digital devices using PLC programming
CO 4	Execute the advance functions of PLC to control the speed of motors and temperature
CO 5	Implement the industrial process to control the devices using SCADA .
