

B.Tech Electronics & Communication Engineering

Sixth Semester (Session 2023-24)

Course Name: BEC3609: Internet of Things with Embedded Systems Lab

BEC3609	Course Outcomes
CO 1	Test Led Control Using Arduino Board.
CO 2	Examine MQTT protocol using Arduino.
CO 3	Design and conduct humidity, temperature using DHT 11 sensor and sent it to local server..
CO 4	Analyze temperature/humidity sensor and write a program to monitor temperature/humidity using Arduino..
CO 5	Design program to continuously monitor sensor reading through internet.
