

TULSIRAMJI GAIKWAD-PATIL

College of Engineering & Technology

Mohgaon, Wardha Road, Nagpur - 441 108

Bachelor of Technology

SoE and Syllabus 2023

(Department of Science and Humanities)

Vision of Institute

To emerge as a learning Center of Excellence in the National Ethos in domains of Science, Technology and Management.

Mission of Institute

M1- To strive for rearing standard and stature of the students by practicing high standards of professional ethics, transparency and accountability.

M2- To provide facilities and services to meet the challenges of Industry and Society.

M3- To facilitate socially responsive research, innovation and Entrepreneurship.

M4- To ascertain holistic development of the students and staff members by inculcating knowledge and profession as work practices.

Tulsiramji Gaikwad - Patil College of Engineering and Technology

Wardha Road, Nagpur - 441 108 Accredited with NAAC A+ Grade

Approved by AICTE, New Delhi, Govt. of Maharashtra

(An Autonomous Institution Affiliated to RTM Nagpur University)

Scheme of Instruction for First Year of B. Tech. (UG) Programme

Group-A Semester - I CSE/IT/DS/ECE

Mandatory 03-Weeks Induction Program in the First Semester for every student

Tulsiramji Gaikwad-Patil College of Engineering and Technology

Wardha Road, Nagpur-441108

NAAC Accredited with A+ Grade

(An Autonomous Institute Affiliated to RTM Nagpur University, Nagpur)

Program: B. Tech First Year Group-A (CSE, IT, DS, ECE)

Semester-I **Algebra & Calculus: BSH31101**

Teaching Scheme

Examination Scheme (Th)

Examination Scheme(P)

Theory (Th)	4Hrs/week	CT-I	15 Marks	-	-
Practical (P)	-	CT-II	15 Marks	-	-
Total Credits	4(Th) = 4	CA	10 Marks	-	-
Duration of ESE:3Hrs		ESE	60 Marks	-	-
		Total Marks	100Marks	-	-

Pre-Requisites: NA

Course Objectives:

1	To expose students to understand the basic importance of Differential Calculus and Integral Calculus.
2	To identify algebraic problems from practical areas and obtain the solution in certain cases.
3	To Understand different solution techniques of solving Beta and Gama Function and also understand solution of simultaneous equation by matrix method.
4	To Apply your understanding of the concepts, formulas, and problem-solving procedures.
5	To introduce vector differential operator for vector function and important theorems on vector functions to solve engineering problems.

Unit I

Integral Calculus: Introduction to Gamma Function & Properties of Gamma Function, Introduction to Beta Function & Properties of Beta Function, Relation between Beta & Gamma Function, Leibnitz's rule for differentiation under integral sign, Tracing of Cartesian and Polar curves.

Unit II

Matrices: Introduction to rank of a matrix; Rank nullity theorem, Eigen values and Eigen vectors, Consistency of a system of equations, Cayley Hamilton Theorem, Sylvester's theorem.

Unit III

Differential Calculus: Indeterminate Forms L'Hospital Rule, Taylor's and Maclaurin's series(for one variable), Maxima and Minima, Successive differentiation, Rolle's theorem, Lagrange's mean value theorem, Cauchy's mean value theorem.

Unit IV

Calculus of Function of several variables: Differentiability of function of several variables, Partial Derivatives, Euler's theorem on homogeneous function, Implicit function, Jacobian and their applications, Chain Rule.

Unit V

Vector Calculus: Vector triple product, product of four vectors Scalar and vector field, Gradient of scalar point function, Directional derivative, divergence and curl of vector point function, Solenoidal and Irrotational motion. Vector Integration: Line and Surface Integral

CO	Course Outcomes	CL	Class Session
CO1	Solve improper integrals using beta,gamma functions	3	10
CO2	Apply the concept of matrices to check existence of solution of system of linear Simultaneous equation.	3	9
CO3	Apply the concept of maxima, minima and successive differentiation in analysis of engineering problems.	3	10
CO4	Use of Partial differentiation to Solve Jacobian and Chain Rule	3	10
CO5	Determine line and surface integral by using the concept of vector calculus.	3	9

Tulsiramji Gaikwad-Patil College of Engineering and Technology

Wardha Road, Nagpur-441108
NAAC Accredited with A+ Grade

(An Autonomous Institute Affiliated to RTM Nagpur University, Nagpur)

Program: B. Tech First Year Group-A (CSE, IT, DS, ECE)

Semester-I **Quantum Physics & Optics: BSH31102**

Teaching Scheme		Examination Scheme (Th)		Examination Scheme(P)	
Theory (Th)	3Hrs/week	CT-I	15 Marks	-	-
Practical (P)	2Hrs/week	CT-II	15 Marks	-	-
Total Credits	3(Th)+1(P) = 4	CA	10 Marks	CA	25Marks
Duration of ESE:3Hrs		ESE	60 Marks	ESE	25Marks
		Total Marks	100Marks	-	50Marks

Pre-Requisites: AICTE Bridge Course, Basics of Physics.

Course Objectives:

- To explain the concept of wave particle duality, wave packet through the De-Broglie hypothesis and Heisenberg uncertainty Principle.
- To interpret the motion of charged particle in electric field, magnetic field and cross configured field through Bethe's law, Cathode ray tube (CRT) and Cathode ray Oscilloscope(CRO).
- To analyze the concept of cut in voltage, voltage regulator and current gain in PN junction diode, Zener diode and transistor respectively.
- To compare the interference in parallel and wedge-shaped thin film and their application in engineering field.
- To demonstrate the concept of total internal reflection through optical fiber.

Course Contents

Unit I	Quantum Mechanics: The wave particle duality of light, The De-Broglie Hypothesis, Wave packet, Phase and group velocity, Heisenberg Uncertainty Principle and its application. Schrodinger equation
Unit II	Electron Ballistics and Electron Optics: Introduction of electric and magnetic field, Uniform Electric Field parallel to electron motion, Uniform Electric Field perpendicular to electron motion, Uniform Magnetic Field parallel to electron motion, Uniform Magnetic Field perpendicular to electron motion, Electric and Magnetic fields in cross configuration, Bethe's law, Devices: Cathode Ray tube, CRO, Block Diagram, Function & working of each block.
Unit III	Semiconductor Physics: Introduction, Intrinsic semiconductors and Extrinsic Semiconductor, PN-junction diode, Hall effect & voltage, Hall coefficient, its application, Zener diode, LED, Transistor (CB, CC&CE mode).
Unit IV	Interference In Thin Film: Introduction, thin film, Plane Parallel thin film, Wedge shaped thin film, Newton rings, Antireflection coating
Unit V	Optical Fibers: Propagation of light by total internal reflection, structure and classification (based on material, refractive index and number of modes), Modes of propagation in fiber, Acceptance angle, Numerical aperture, Attenuation and dispersion. Applications of Optical fiber

Text Books

T.1	A textbook of Engineering physics: Dr. M. N. Avadhanulu, Dr. P. G. Kshirsagar, 8 th Revised Edition, S. Chand Publication, New Delhi.
T.2	A textbook of Optics: N. Subrahmanyam, Brij Lal, M.N. Avadhanulu, 23 rd Revised and Enlarged Edition 2006, S. Chand Publication, New Delhi.

LIST OF EXPERIMENTS (Quantum Physics & Optics-Lab: BSH31103)		
1	Determination of acceptance angle and numerical aperture using optical fiber kit.	CO1
2	Determination of e/m ratio of an electron by Thomson method .	CO2
3	Determination of ripple factor and rectification efficiency by Half Wave and Full Wave Rectifier with CRO.	CO2
4	Determine the Cut in Voltage and Dynamic Resistance of P-N Junction Diode in Forward and Reverse Biased	CO3
5	Determine the Break Down Voltage and Dynamic Resistance of Zener Diode.	CO3
6	Determination of Dynamic Resistance and Current Gain of Transistor in Common Base Mode..	CO3
7	Determination of Dynamic Resistance and Current Gain of Transistor in Common Emitter	CO3
8	Determination of the Wavelength of Sodium Light By Using Newton rings experiment.	CO4
9	Determination of Fringe width by using Wedge shaped thin film.	CO4
10	Determination of Planck's constant.	CO5

CO	Course Outcomes	CL	Class Sessions
CO1	Interpret the behavior of wave particle duality, wave packet with their quantum application	3	9
CO2	Illustrate the concept of motion of charged particle in electric field, magnetic field and cross configured field.	3	10
CO3	Explain PN junction diode, Zener diode, Light emitting diode and transistor with their application in engineering field.	4	10
CO4	Differentiate interference phenomenon in parallel and wedge-shaped thin film and their application in engineering field.	4	10
CO5	Classify types of optical fiber and their application in various fields.	4	9

Tulsiramji Gaikwad-Patil College of Engineering and Technology

Wardha Road, Nagpur-441108
NAAC Accredited with A+ Grade

(An Autonomous Institute Affiliated to RTM Nagpur University, Nagpur)

Program: B. Tech First Year Group-A (CSE, IT, DS, ECE)

Semester-I **Principle of Electronics Engineering & Digital Circuit : BEC31101**

Teaching Scheme		Examination Scheme (Th)		Examination Scheme(P)	
Theory (Th)	3Hrs/week	CT-I	15 Marks	-	-
Practical (P)	2Hrs/week	CT-II	15 Marks	-	-
Total Credits	3(Th)+1(P) = 4	CA	10 Marks	CA	25Marks
Duration of ESE:3Hrs		ESE	60 Marks	ESE	25Marks
		Total Marks	100Marks	-	50Marks

Pre-Requisites: NA

Course Objectives:

1.	To Examine electrical circuits, R,L & C elements and voltage & current sources.
2.	To Implement Half Wave Rectifier , Full Wave Rectifier
3.	To Illustrate the number system, Number Base Conversion & applications.
4.	To Estimate Digital logics gates AND gate, OR gate, NOT gate, NAND gate & NOR gate, Ex-OR, Ex-NOR Symbol & truth table
5.	To Examine the Design procedure for Half adder, Full adder, Subtractor circuit. Multiplexer and Demultiplexer

Course Contents

Unit I	Electrical circuits: electrical circuits elements R,L & C Voltage & current sources , Kirchoffcurrent & voltage law , analysis of simple circuits with dc excitation Superposition Theorem
Unit II	Semiconductor Diodes: Introduction , PN Junction diode, Characteristic sand Parameters, Diode Approximations ,DC Load Line analysis. Diode Applications: Introduction, Half Wave Rectifier, Full Wave Rectifier Zener Diodes: Junction Breakdown, Circuit Symbol and Package, Characteristics and Parameters, Equivalent Circuit, Zener Diode Voltage Regulator
Unit III	Number system and codes: Binary numbers, Number Base Conversion, octal & Hexa Decimal Numbers, BCD Conversion, signed and unsigned binary Basic Binary addition and subtraction, Complements, 1's and 2's complement representation.
Unit IV	Boolean Algebra : Digital logics gates AND gate, OR gate, NOT gate, NAND gate& NOR gate. Ex-OR, Ex-NOR Symbol & truth table Universal Gates, Laws of Boolean algebra, De-Morgan's theorem Min term, Max term, POS, SOP, K Map, Simplification by Boolean theorems, don't care condition
Unit V	Combinational Logic circuits: Introduction, Design procedure Adders-Half adder, Full adder, Subtractor circuit. Multiplexer and De multiplexer

Text Books

T.1	1. Electronic Devices and Circuits David A Bell, 5 th Edition, Oxford, 2016
T.2	2. Digital Logic and Computer Design M.MorrisMano,PHILearning,2008ISBN-978-81-203-0417-8

Reference Books

LIST OF EXPERIMENTS (Principles of Electronics Engineering and Digital Circuits-Lab : BEC31102)

1	To plot and draw the Forward and Reverse bias V-I Characteristics of a P-N Junction diode.	CO1
2	To observe and draw the static characteristics of a Zener Diode.	CO2
3	To examine the input and output waveforms of Half wave Rectifier.	CO2
4	To Examine the input and output waveforms of Full Wave Rectifier.	CO3
5	To Construct and verify the truth tables of different logic gates	CO3
6	To Design and implement Universal Gates NAND & NOR	CO3
7	To Verify proof of De-Morgan's theorem Boolean algebra	CO4
8	To Design and execute Adder and Subtractor circuit	CO4
9	To Design and verify truth table of multiplexer and De multiplexer.	CO5
10	Explore the principles of insulation resistance measurement with a megger and clamp-on current measurement with a tong tester.	CO5

Text Books

T.1	A Text Book of Electrical Technology: B. L. Thareja and A. K. Thareja, S. Chand Publication (Volume I, II & III). 2011

Semester-I Programming for Problem Solving: BIT31101

Teaching Scheme		Examination Scheme (Th)		Examination Scheme(P)	
Theory (Th)	3Hrs/week	CT-I	7 Marks	-	-
Practical (P)	-	CT-II	7 Marks	-	-
Total Credits	2(Th) = 2	CA	6 Marks	-	-
Duration of ESE:2Hrs		ESE	30 Marks	-	-
		Total Marks	50 Marks	-	-

Pre-Requisites: NA

Course Objectives:

1. The course aims to provide exposure to problem-solving through programming.
2. It aims to train the student to the basic concepts of the C-programming language.
3. This course involves a lab component which is designed to give the student hands-on experience with the concepts.

Course Contents

Unit I	Introduction to C: History of C, Features of C, Structure of C program, Character Set, C Tokens-Keywords, Identifiers, Constants, Variables, data types, Operators, variable declaration, Assigning Value to variable, Introduction to Computing: Algorithm, Flowchart, Representation of Algorithm and Flowchart with examples.
Unit II	Operator and Expression: Arithmetic, Relational, Logical, Assignment, Increment and Decrement, Conditional operator, Bitwise operators, size of operator, Arithmetic Expression, Evaluation expression. Programming Basics: Components of C language. Standard I/O in C, Format Specifies, Writing and executing C program, Syntax and logical errors in compilation, object and executable code.
Unit III	Statements-Selection statements (Decision Making): IF, IF-ELSE, Nested IF-ELSE and switch statements with examples, Repetition statements (loops) - while, for, do-while statements with examples, Unconditional statements- break, continue, goto statements with examples.

Text Books

T.1	Computer Programming with C, Special Edition-MRCET, Mc Graw Hill Publishers 2017.
T.2	Computer Science: A Structured Programming Approach Using C, B.A.Forouzan and R.F. Gilberg, Third Edition, Cengage Learning.

Pre-Requisites: NA

Course Objectives:

1	Students will be able to proficiently identify and understand the hardware components of a computer system.
2	To equip students with a comprehensive understanding of the Windows XP / Linux operating system installation process.
3	To empower students with the knowledge of Local Area Networks (LANs) and Internet access.
4	Student will be able to achieve the different alignments.
5	To empower students with a comprehensive understanding of computer hardware, software, networking, and troubleshooting.

Course Contents

Unit I	Introduction to Computer :- Characteristics of Computers, Basic Applications of Computer, Classifications of Computers: Representation of data/Information concepts of data processing, Definition of Information and data, Basic data types Storage of data/Information as files
Unit II	Components of Computer System: Central Processing Unit(CPU), VDU, Keyboard and Mouse, Other input/output Devices, Computer Memory, Concepts of Hardware and Software
Unit III	Introduction to Operating System :- Overview of Operating System, Booting Process of Operating System, Functions or Tasks of the Operating System, I/O Management, Data Management, Memory Management, Device Management.
Unit IV	PC Troubleshooting, Maintenance and Tools: - Preventive Maintenance: Active, Passive, periodic maintenance procedure, Preventive maintenance of peripherals of PCs. Fault finding and troubleshooting of the above peripherals, Diagnostic software.
Unit V	Introduction of TCP/IP:- Characteristics of TCP/IP, TCP/IP Layers, Application/Uses of TCP/IP , Introduction of LAN, WAN and MAN Microsoft Office Installation and Document Formatting:- Microsoft Office Installation, Introduction to Microsoft Word/Excel/Power Point Presentation, Document Formatting and Styling, Advanced Word Features

Bus Cables 4. Hard Disk Drive 12. Power 5. Cabinet 13. SMPS 6. Speaker 14. Screw 7. Key Board 15. Printer 8. Mouse 16. CD or DVD ROM Cables Driver	CO2
3	The installation steps for the Windows operating system. Requirement: 1. Operating System CD 2. Computer	CO3
4	The installation steps for the Linux operating system. Requirement: 1. Operating System CD 2. Computer	CO3
5	To facilitate a software troubleshooting exercise, students will be provided with a malfunctioning CPU afflicted by system software issues. Their task will be to diagnose and resolve the problem to restore the computer to working condition.	CO4
6	To learn about Local Area Networks and Internet access, students will configure the TCP/IP settings. In the final step, students should demonstrate to the instructor how to access websites and email	CO5
7	To learn about various internet threats and configure their computer to be secure while online.	CO5
8	Installation MS Office Apply different alignments, correct formats in MS-Word, Excel and Power Point Presentation.	CO5
9	Create a Visiting Card of your college using page size as follows <ul style="list-style-type: none"> • Page width="3.2" • Page height="2" And use different font styles, sizes, alignments, and apply printed water mark on the paper.	CO5
10	Create a mail merge to call 10 members for an interview.	CO5

CO	Course Outcomes	CL	Lab Sessions
CO1	Apply the characteristics of computers, including speed, accuracy, versatility, and automation.	3	4
CO2	Demonstrate the proper use of input devices like keyboards and mice to interact with a computer.	3	4
CO3	Demonstrate the ability to install and configure an operating system on a computer.	3	4
CO4	Analyze common hardware issues that occur with peripherals and develop systematic troubleshooting approaches.	4	4
CO5	Utilize advanced formatting tools and styles in Microsoft Word to create professionally styled documents.	5	4

-

50 Marks

Pre-Requisites: NA

Course Objectives:

- 1 Understand the concept, process and importance of communication
- 2 Gain knowledge of media of communication
- 3 Develop skills of effective communication both written and oral
- 4 Pursuing the audience
- 5 Growing brand awareness

Course Contents

Unit I

Introduction to Communication – Definition of Communication, Process of Communication, Importance of Communication, Essentials of Good communication.

Unit II

Different forms of communication - Verbal communication, Non-Verbal communication, Written communication, Barriers to Communication.

Unit III

Development of English Language skills - Listening skills& it's types, Speaking skills it's elements, Reading skills& it's types, Writing skills

Unit IV

Development of Personality:- The concept of Personality, Body Language, Dimensions of Personality, Building Confidence, Presentational Skills, Group Discussion, Interview Techniques

Unit V

Attitude and Motivation - Concept of Attitude, Types of Attitude, Concept of Motivation, Importance of Self-motivation

Text Books

- 1 Public Speaking and Influencing Men in Business by Dale Carnegie
- 2 Technical Communication by Meenakshi Raman and Sangeeta Sharma ,OUP
- 3 Communication Skills by Dr. P.Prasad
- 4 Communication Skills by Sanjay Kumar and Pushpalata, OUP

Reference Books

- 1 Personality Development And Soft Skills by Barun K. Mitra.
- 2 **The Magic of Thinking Big** by David J. Schwartz

List of Experiment		CO
1	Introduction to Communication: Process & Techniques	CO1
2	Demonstrate 7C'S of Communication.	CO1
3	Explain Verbal & Non-verbal Communication	CO2
4	Description of Barriers to Communication: Methods to Overcome Barriers.	CO2
5	Acquire knowledge of Listening and Speaking skills.	CO3
6	Acquisition of Reading & Writing Skills.	CO3
7	Execute the Skills of Body Language.	CO4
8	Learning the Presentational Skills and Interview Technique.	CO4
9	Discuss concept of Self-motivation and it's importance.	CO5
10	Development of Positive Attitude.	CO5

CO	Course Outcomes	CL	Lab Sessions
CO1	Learn the importance and process of Communication.	4	4
CO2	Apply the skills of Verbal and Non-verbal communication and how to Overcome the barriers.	4	4
CO3	Execute the skills of Learning, Speaking, Reading and Writing to communicate effectively with engineering community and society.	5	5
CO4	Demonstrate the Skills for effective presentation and effective body language.	5	4
CO5	Acquire the knowledge of positive attitude and self-motivation.	5	4

Sheet No.	List of Experiments/Drawing sheets	
1	SWOT Analysis and it's application in marketing challenges.	CO1
2	SWOC Analysis for a company's success and growth	CO1
3	Family Budget Info graphic .	CO2
4	Describe the Pie Chart showing the percentage of a family's household income distributed into different categories	CO2
5	Design a bar graph representing Do's and Dont's of human values during selfless service.	CO3
6	Design a tool for measuring your Emotional, Intelligent Quotient.	CO3
7	Geometric Art : Using geometric shapes / patterns measure your academic growth by assessing the accuracy of angles, symmetry and precision in your art..	CO4
8	Assess your inspirational growth through historical diorama of any one Legend of India, you consider as your role model.	CO4
9	Evaluate overall growth by designing a book cover and by analyzing how well the cover captures the essence of the story.Draft a story using a fictional character	CO5
10	Showcase your own style or method of work intending your versatility through portfolio	CO5

CO	Course Outcomes	CL	Class Session
CO1	Apply soft skills that complement hard skills.	3	4
CO2	Analyze self and prepare for the modern challenges	4	4
CO3	Promoting fortitude in the face of failures, unity amongst family discord, self- discipline amidst distractions, and many more priceless lessons.	5	4
CO4	Analyze morality and character development.	4	4
CO5	Analyze the core of student growth, to enable students to become self-aware, sincere, and successful in their many roles as an ambitious student.	4	4

Pre-Requisites: NA

Course Objectives:

- 1 To utilize consistency of system of equations.
- 2 To make students acquainted with advance techniques to evaluate integrals.
- 3 Identify the type of a given differential equation and select and apply the appropriate analytical Technique for finding the solution of first order and selected higher order ordinary differential equations.
- 4 To gain Statistical knowledge that helps to use the proper methods to collect the data, employ the Correct analyses and find the result.
- 5 To introduce students to Discrete and Continuous Random Variables concepts and their use in real world phenomena.

Unit I

Differential Equation: Order and Degree of D.E, Linear and Exact Differential Equations, First order & First degree D.E. solvable for p, Equations solvable for y, Equations solvable for x, Application :Newton's law of cooling, Data Analysis through Programming.

Unit II

Higher Order Differential Equation: Higher order linear D.E. with constant coefficient, Method of variations of Parameters, Cauchy's form, Legendre's Linear Equations. Application of second order differential equation to R-L-C CIRCUIT, Heat Equations.

Unit III

Multivariable Calculus (Integration): Double Integration (Cartesian and polar coordinates), Change of Order of Integration, Elementary Triple Integration, And Application: Area by double integration and volume by triple integration.

Unit IV

Probability: Conditional Probability, Discrete Random Variable, Continuous Random Variable, Probability Distribution function, Probability density function, Binomial Distribution, Uniform Distribution

Unit V

Statistics: Measures of central tendency: Skewness and Kurtosis, Coefficient of variation, Moments, Fitting of straight line, Fitting of parabola and exponential curves, Lines of regression and correlation, Rank correlation.

Pre-Requisites: AICTE Bridge course, Energy sources, Thermodynamics and Equilibrium, Basics of Electrochemistry.

Course Objectives:

- To gain the knowledge of Energy sources, types & Application.
- To enable to students to upgrade the existing knowledge of water technology.
- To inculcate knowledge about Advance material.
- To enlighten the students to the basic process and laws in Electrochemistry.
- To gain the knowledge on synthesis, properties and applications of polymers.

Course Contents

Unit I	Energy Sources: Introduction of energy, types of Energy (conventional and non-conventional energy sources), Introduction of fuels, classification and application, Calorific value determination of solid, liquid and Gas, Analysis of solid fuels, Fractional distillation, CNG and Bio-Diesel.
Unit II	Advanced Material and E-Waste Management: Introduction of Advance material, Composite Material, Nano materials and Application in electronics devices. Introduction of E-waste, Types of E-Waste and its control.
Unit III	Water pollution and Softening processes: Introduction, Sources of pollution, Hardness, Coagulation, Sterilization, Softening process (Zeolite process and Ion Exchange Process) Boiler trouble due to scale and sludge, Desalination of water by Reverse osmosis, Demineralization techniques.
Unit IV	Electrochemistry & Battery Technology: Basics of Electrochemistry, Laws of Electrochemistry, Concept of Galvanic Series, Introduction of batteries, Types of Batteries (Carbon-Zn, Alkaline-Zinc, NICAD, Lead Acid battery) H ₂ -O ₂ Fuel cell and its applications.
Unit V	Polymer Science: Introduction, Classification of Polymers, Uses of commercially important polymers with synthesis and applications, Conducting & Insulating Polymers

Duration of ESE:3Hrs		ESE	60 Marks	ESE	25Marks
		Total Marks	100Marks	-	50Marks

Pre-Requisites: NA

Course Objectives:

1. The course aims to provide exposure to problem-solving through programming.
2. It aims to train the student to the basic concepts of the C-programming language.
3. This course involves a lab component which is designed to give the student hands-on experience with the concepts.
4. To express algorithms and draw flowcharts in a language independent manner
5. To describe the techniques for creating program modules in C using functions

Course Contents

Unit I	Functions: Introduction, Uses of function, Designing Structured Programs, Scope rule of Function , Return type, Types of Functions-User defined functions, Standard functions, Categories of functions, Call by value and call by reference, Parameter Passing techniques, Storage classes, Recursion.
Unit II	Arrays: Array notation and representation, manipulating array elements, using multidimensional arrays. Character arrays and strings, declaring Structure, union, enumerated data types, Array of structures, passing arrays to functions. Basic Algorithms: Searching & Basic Sorting Algorithms (Bubble, Insertion and Selection).
Unit III	Strings: Arrays of characters, variable length character strings, inputting character strings, character library functions, string handling functions.
Unit IV	Pointers: Introduction, declaration, applications, Introduction to dynamic memory allocation (malloc, calloc, realloc, free), Use of pointers in self-referential structures, notion of linked list (no implementation)
Unit V	File handling: Data organization, File operation, and File I/O functions, File opening modes, Reading, Trouble in opening file, Standard C preprocessors, defining and calling macros, command-line arguments.

Text Books

1	Computer Programming with C, Special Edition-MRCET, Mc Graw Hill Publishers 2017.
2	Computer Science: A Structured Programming Approach Using C, B.A.Forouzan and R.F. Gilberg, Third Edition, Cengage Learning.

Reference Books

Course Objectives:

1. **To explain** the information about the rich culture of the Indian Civilization & varied ancient knowledge systems.
2. **To describe** the significance of the scientific concepts and achievements of ancient Indian scholars in fields of Science, Astronomy & Mathematics.
3. **To illustrate** the traditional scientific, technical and architectural structures and their significance in traditional knowledge of Bhārata.

Course Contents

Unit I

Indian (Bharatiya) Civilization & Development of knowledge System

Discovery of the Saraswatī River, the Saraswatī-Sindhu Civilization, Traditional Knowledge System, The Vedas, Main Schools of Philosophy, Ancient Education System, the Takṣaśilā University, the Nālandā University.

Unit II

Science, Astronomy, and Mathematics

Concept of Matter, Life and Universe, Gravity, History and Culture of Astronomy, Sun, Earth, Moon, and Eclipses, Earth is Spherical and Rotation of Earth, Indian ancient Mathematics.

Unit III

Engineering, Technology, and Architecture

Pre-Harappan and Sindhu Valley Civilization, Social & Economic Life, Metallurgy, Engineering Science and Technology in the Vedic Age and Post-Vedic Records, Ancient Architecture.

Text Books

1

Introduction to Indian Knowledge System; Concepts & Applications, by B. Mahadevan, Vinayak Rajat Bhat, Nagendra Pavana R.N. Eastern Economy Edition, PHI Learning PVT LTD, Delhi (2022)

Pre-Requisites: NA

Course Objectives:

- To develop drawing using bureau of Indians standers (BIS).
- To impart the knowledge on the projection of line, plane and solids.
- To develop the computer based design of vectors, graphic elemebts.
- To make the students understand the Polygon, segments.
- To utilize matrix transformation, windowing & clipping

Course Contents

UnitI	Engineering Curves: Ellipse, Parabola, Hyperbola (Minimum four curves) Define: Cycloid, Involute, Archimedean Spiral.
UnitII	Projections of Lines: Basics of Orthographic Projection. Projections of lines are inclined to one & parallel to other reference plane. (Minimum four problems) Projections of Planes: Basics of Orthographic Projection. Projections Plane is inclined to one & parallel to other reference plane. (Minimum four problems)
UnitIII	Line generation: Points lines, Planes, Pixels and Frame buffers, vector and character generation. Graphics Primitives: Display devices, Primitive devices, Display File Structure, Display control text.
Unit IV	Polygon: Polygon Representation, Entering polygons, Filling polygons. Segments: Segments table, creating deleting and renaming segments, visibility, image transformations.
UnitV	Transformations: Matrices transformation, transformation routines, displays procedure. Windowing and Clipping: Viewing transformation and clipping, generalize clipping, multiple windowing.

Course Objectives:

1. Aware about different tools for Web Programming.
2. Demonstrate competency in the use of common HTML code.
3. Able to design efficient client as well as server side scripts.
4. Construct efficient web pages with CSS and JavaScript.
5. Aware about different tools for Web Programming.

Course Contents

Unit I	Web Foundations: The Evaluation of the Web, History of the Web, Internet Application , Networks, TCP/IP, Higher Level Protocols, Components of the Web, Web Search Engines, Web Servers, Application Servers
Unit II	HTML - History of HTML, Title and Footers, Text Formatting, Emphasizing Material in a Web Page List, Text Styles, Other Text Effects, Lists, Adding Graphics to HTML Documents, Tables, Linking Documents ,images, forms, Frames, Global Attributes <sup> Tag, <svg> Tag,
Unit III	Cascading Style Sheets:- Introduction CSS, Creating Style Sheets, Common Tasks with CSS, Colours - Colour Properties, Image Properties, Position Properties, Background Properties, The Font Family, Layer Tag
Unit IV	XML: Introduction to XML, Features of XML, Defining XML tags, their attributes and Values, Document Type Definition, XML Schemes, Document Object Model.
Unit V	JavaScript: Introduction JavaScript, JavaScript in Web pages:- Netscaps and JavaScript, Client side JavaScript, Data Types and Literal, Boolean, String, Null, Type Casing, Operators and Expressions in JavaScript.

Text Books

1	Web Technologies Black Book: HTML, JavaScript, PHP, Java, JSP, XML and AJAX, Kogent Learning Solutions Inc., Dreamtech Press, 2009
2	M. Srinivasan, Web Technology: Theory and Practice, Pearson India, 2012.
3	The Complete Reference PHP — Steven Holzner, Tata McGraw-Hill

Reference Books

1	Internet and World Wide Web — How to program. Dietel and Nieto, Pearson.
2	Web Programming, building internet applications, Chris Bates 2" edition, Wiley Dreamtech
3	Java Server Pages —Hans Bergsten, SPD O'Reilly,

List of Experiment		CO
1	Demonstrate various tags in HTML.	CO2
2	Design a page having suitable background color and text color with title “My First Web Page” using all the attributes of the Font tag.	CO2
3	Create a HTML document giving details of your [Name, Age], [Address, Phone] and [Register Number, Class] aligned in proper order using alignment attributes of Paragraph tag.	CO2
4	Write HTML code to design a page containing some text in a paragraph by giving suitable heading style.	CO2
5	Create a page to show different character formatting (B, I, U, SUB, SUP) tags. viz : log b m^p= p log b m	CO2
6	Using HTML, CSS create a staggered animation for the elements of a list. <ul style="list-style-type: none"> • Set opacity: 0 and transform: translate X(100%) to make list elements transparent and move them all the way to the right. • Specify the same transition properties for list elements, except transition-delay. • Use inline styles to specify a value for --i for each list element. This will in turn be used for transition-delay to create the stagger effect. • Use the :checked pseudo-class selector for the checkbox to style list elements. Set opacity to 1 and transform to translateX(0) to make them appear and slide into view. 	CO3
7	Using HTML, CSS create display an image overlay effect on hover. <p>a)Use the :before and :after pseudo-elements for the top and bottom bars of the overlay respectively. Set their opacity, transform and transition to produce the desired effect.</p> <p>b)Use the <figcaption> for the text of the overlay. Set display: flex, flex-direction: column and justify-content: center to center the text into the image.</p> <p>c)Use the :hover pseudo-selector to update the opacity and transform of all the elements and display the overlay.</p>	CO3
8	Using HTML, CSS create a bouncing loader animation. <ul style="list-style-type: none"> • Use @keyframes to define a bouncing animation, using the opacity and transform properties. Use a single axis translation on transform: translate3d() to achieve better animation performance. • Create a parent container, .bouncing-loader, for the bouncing circles. Use display: flex and justify-content: center to position them in the center. • Give the three bouncing circle <div> elements the same width and height and border-radius: 50% to make them circular. • Apply the bouncing-loader animation to each of the three bouncing circles. • Use a different animation-delay for each circle and animation-direction: alternate to create the appropriate effect. 	CO3
9	A sample html file with a submit button. Now modify the style of the paragraph text through javascript code.	CO5
10	Write a JavaScript function to get the values of First and Last names of the following form.	CO5

CO	Course Outcomes	CL	Lab Sessions
CO1	Apply the basics fundamentals for Web Foundations.	3	4
CO2	Apply the knowledge of formatting Tags for web developments in HTML	3	4
CO3	Preparing high level formatting by using Cascading style sheet.	3	4
CO4	Apply information exchange between computer systems such as websites, databases, and third-party applications.	3	4
CO5	Validating User's Input. JavaScript is very useful while using forms	5	4

Tulsiramji Gaikwad-Patil College of Engineering and Technology

Wardha Road, Nagpur-441108
NAAC Accredited with A+ Grade

(An Autonomous Institute Affiliated to RTM Nagpur University, Nagpur)

Program: B. Tech First Year Group-A (CSE, IT, DS, ECE)

Semester-I Python Programming: BIT31205

Teaching Scheme		Examination Scheme (Th)		Examination Scheme(P)	
Theory (Th)	-	CT-I	-	-	-
Practical (P)	4Hrs/week	CT-II	-	-	-
Total Credits	2(P)	CA	-	-	25 Marks
Duration of ESE:2Hrs		ESE	-	-	25 Marks
		Total Marks			50 Marks

Pre-Requisites: NA

Course Objectives:

- To read and write simple Python programs.
- To develop Python programs with conditionals and loops
- To define Python functions and call them.
- To use Python data structures lists, tuples, and dictionaries.
- To do input/output with files in Python.

Course Contents

Unit I	Introduction to Python Programming Language: Introduction to Python Language, python interpreters, working with python, Numeric Data Types: int, float, Boolean, complex and string and its operations, Standard Data Types: List, tuples, set and Dictionaries, Data Type conversions, commenting in python.
Unit II	Variables and Operators: Python variables, Multiple variable declarations, Python basic statements, Python basic operators: Arithmetic operators, Assignment operators, Comparison operators, Logical operators, Identity operators, Membership operators, Bitwise operators, Precedence of operators, Expressions.
Unit III	Control Flow and Loops: Conditional (if), alternative (if-else), chained conditional (if- elif -else), Loops: For loop using ranges, string, Use of while loops in python, Loop manipulation using pass, continue and break
Unit IV	Functions: Calling Functions, passing parameters and arguments, Python Function arguments: Keyword Arguments, Default Arguments, Variable-length arguments, Anonymous Functions, Fruitful Functions (Function Returning Values), Scope of the Variables in a Function - Global and Local Variables. Powerful Lambda functions in python.
Unit V	File Handling and Exception handling: Overview, Access Modes, Writing Data to a File, Reading Data from a File, Additional File Methods introduction to Errors and Exceptions, Handling IO Exceptions, Run Time Errors, Handling Multiple Exceptions.

3	https://nptel.ac.in/courses/106107220

List of Experiment		CO
1	Installation of Python path setting and its testing.	CO1
2	Design a python program to get string, int, float input from user and observe the output	CO1
3	Implementation of Python programming on various conditional operators	CO1
4	Implement a program to find the smallest and largest number in the list?	CO2
5	Implement a code to perform arithmetic, assignment, logical and comparison operators?	CO2
6	Write a Program to read a number and display corresponding day using if_elif_else?	CO3
7	Design a python program using with any one of python function argument?	CO4
8	Implement a python program to write the content “hi python programming” for the existing file.	CO5

CO	Course Outcomes	CL	Class Session
CO1	Analyze and understand the behavior of fundamental programming concepts	4	4
CO2	Demonstrate the knowledge concepts of Python Language	3	4
CO3	Decompose a Python program into functions.	3	4
CO4	Analyze compound data using Python lists, tuples, and dictionaries.	4	4
CO5	Evaluate read and write data from/to files in Python Programs	5	4

Program: B. Tech First Year Group-A (CSE, IT, DS, ECE)

Semester-I **Business Communication: BSH31X09**

Teaching Scheme

Examination Scheme (Th)

Examination Scheme(P)

Theory (Th)	-	CT-I	-	-	-
Practical (P)	4Hrs/week	CT-II	-	-	-
Total Credits	2(P)	CA	-	-	25 Marks
Duration of ESE:2Hrs		ESE	-	-	25 Marks
		Total Marks		-	50 Marks

Course Objective:

- 1 To understand the importance of knowledge of additional language.
- 2 To understand the importance of the language for daily routine.
- 3 To make students confident while communicating.
- 4 To understand the modes of communication.
- 5 To impart the knowledge for the personal details.

Course Contents

Unit I	Introduction to communication: Meaning & Definition of communication, Characteristics of communication, Objectives of communication, social understanding, behaviors traits, teamwork
Unit II	Communication Skills: Importance of communication, types, barriers of communication, effective communication, Listening Skills, behaviors traits, teamwork. Barriers to communication, Essentials of effective communication.
Unit III	Media of communication and Channels of communication: Oral media, Written media, Non-verbal media, Downward channels of communication, Upward channels of communication, Horizontal communication.
Unit IV	Technical Writing: Features of Technical Writing, Writing Scientific Projects, Technical Report writing, Writing Manuals, Writing Project Proposals, Writing Research papers.
Unit V	Presentation Skills: Importance of oral presentation, preparing and planning the presentation, organizing your presentation, checklist for making presentation. Leadership skills, decision making, negotiation skills.
