Third Year (Semester-VI) B. Tech. Information Technology
BIT33608: - Natural Language Processing (Program Elective-III)

BIT33608	Course Outcomes
BIT33608.1	Classify the ability to preprocess text data using NLP techniques.
BIT33608.2	Demonstrate syntactic parsing methods, including context-free grammars and dependency parsing.
BIT33608.3	Analyze semantic structures and apply information retrieval techniques to extract meaningful insights from text.
BIT33608.4	Interpret language models and perform text classification using algorithms in NLP.
BIT33608.5	Evaluate real-world applications of Natural Language Processing
