Department of Information Technology

(B.Tech. VII Semester)

Course Name BITXX04: Artificial Intelligence (Open Elective)

BITXX04	Course Outcomes
BITXX04.1	**Demonstrate** the Knowledge of the building blocks of AI as present in terms of intelligent.
BIT XX04.2	**Analyze** and Formalize the problem as a state space , graph design heuristics and select amongst different search or game based techniques to solve them
BIT XX04.3	**Create** an understanding of basic issue of knowledge representation
BIT XX04.4	**Formulate** and solve problem with uncertain information using Bayesian approaches
BIT XX04.5	**Attain** the capability to represent various real life problem domain using logic based techniques.
